18 March 1986

Dear Fellow Montanans:

In 1985, Montana's highways became as safe as they were in the 1960's. Montana's driving public recorded a 25-year low in traffic fatalities.

Why? Because you, the people of Montana cooperated with law enforcement.

You complied voluntarily with traffic laws, you supported safety education programs and you showed concern for your fellow human beings on the streets and highways of this state. Thanks to you and the efforts of law enforcement throughout Montana, the number of fatalities and injuries declined significantly.

Together we can reinforce this positive trend. Your Department of Justice and the Montana Highway Patrol Division will continue to train our officers in the latest effective methods in preventing accidents. We will continue to provide traffic safety information to the motoring public. We will make every effort to improve our service to you on the road.

Thank you for your help, and keep up the good work. Remember not to drink and drive, and please, wear your safety belts.

With best wishes, I am

Very truly yours,

Mike Greely

MIKE GREELY
Attorney General

Department of Justice
MONTANA HIGHWAY PATROL
303 ROBERTS, HELENA, MONTANA 59620 (406) 444-3000

Honorable Mike Greely
Attorney General
Justice Building
215 North Sanders
Helena, MT 59620

Dear Sir:

To you and the citizens of Montana, I respectfully submit this 1985 report of traffic accident analysis.

Our 50th year of service accomplishments show continuing efforts to reduce death, injury and property destruction. The traffic fatality toll of 223 persons killed was the lowest figure since 1960. The total number of accidents and personal injuries sustained showed a decline. Another highlight of the past year was fewer deaths involving our young people. This positive reaction to our safety education and enforcement efforts is encouraging.

The 1985 experience had at least one area of major concern. The number of drinking drivers involved in fatal accidents rose from the previous year's low.

Improved training for each officer is continuing to support our efforts to better serve the public. Highway safety education and public information programs provide a positive communication with the motoring public. This training, along with continuing support from the motoring public, will assist in dealing with the traffic problem.

The loss of life and limb on Montana's highways and streets continues to be greater than all deaths and injuries from crime and fire combined. The economic loss from traffic accidents for 1985 is estimated to be in excess of 134 million dollars.

Your support and direction in meeting the demands placed upon us is greatly appreciated.

Sincerely,

R.W. Landon

COLONEL R. W. LANDON
Chief Administrator
Montana Highway Patrol

MONTANA'S 1985 TRAFFIC TOLL

* 223 FATALITIES	* ONE FATALITY EVERY 39.3 HOURS
* 8,702 INJURIES	* ONE INJURY EVERY 60.4 MINUTES
* 17,938 ACCIDENTS REPORTED	* ONE ACCIDENT EVERY 29.3 MINUTES
* $134 MILLION ECONOMIC LOSS	* $368,651.62 LOSS EVERY DAY

MONTANA

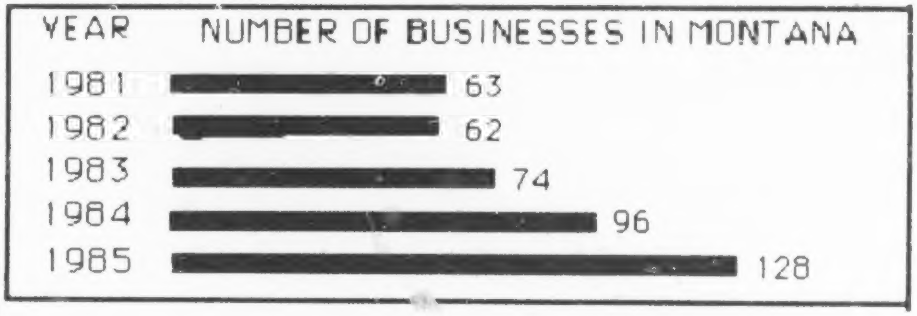
EMPLOYMENT AND LABOR FORCE QUARTERLY REPORT

FIRST QUARTER 1986

One of the fastest growing businesses in Montana is equipment rental and leasing services



the major reason is videocassette rentals.

YEAR	UNIT RENTALS (In millions)	AVERAGE PRICE (Per rental)	DOLLAR RENTALS[1] (In millions)
1981	37.8	$3.75	$141.8

MONTANA EMPLOYMENT AND LABOR FORCE

Quarterly Report

1st. Qtr. 1986

STATE OF MONTANA

TED SCHWINDEN, GOVERNOR

Department of Labor and Industry

Gene Huntington, Commissioner

All statistics for labor force employment, unemployment, and unemployment rates contained in this publication are in accordance with the Federal guidelines as established by the Bureau of Labor Statistics. Methodology procedures use a household sample conducted in Montana on a monthly basis which is called the Current Population Survey. These official statistics are used to allocate Federal funds and to determine eligibility for Federal assistance programs.

STATE CAPITOL

STATE OF MONTANA

HELENA, MONTANA 59624
P.O. Box 1728

Dear Reader:

The purpose of this publication is to report labor market information for the state of Montana. Economic conditions in Montana are highlighted in narrative form and in statistical tables.

Most of the information is obtained through surveys of the population and employers in federal-state cooperative programs. Other sources of information include administrative records, selected economic indicators, and nationally collected statistics.

I am sure this publication will be useful to you. Any suggestions or comments for improvements are always welcome.

Sincerely,

Bob Rafferty

Bob Rafferty, Chief
Research & Analysis Bureau

GLOSSARY OF TERMS

1. Civilian Labor Force - the number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.

2. Employed - those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who, although not working had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.

3. Unemployed - the number of persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).

4. Unemployment Rate - the number of unemployed expressed as a percent of the civilian labor force.

5. Residence Data - a count of people by where people live.

6. Establishment Data - a count of jobs by where people work.

7. Seasonally Adjusted Labor Force Series - to facilitate the evaluation of the labor force, recurrent yearly movements have been isolated and removed using the X-11 ARIMA method of seasonal adjustment. This is the same method used by the Bureau of Labor Statistics to seasonally adjust the national labor force series.

8. Real Spendable Average Weekly Earnings of Private Nonagricultural Production Workers - represents the earnings of a hypothetical individual after deductions for State Income, Federal Income and Social Security taxes, and adjustment for change in purchasing power since 1967. This individual is assumed to be sole support for a family of four, earn the average weekly gross earnings of production workers in Montana's private nonagricultural industries, and take standard deductions on State and Federal income taxes. Taxes were computed using standard tax tables, and purchasing power was adjusted by deflating Spendable Earnings based on the national Consumer Price Index.

9. MSA - Metropolitan Statistical Area - as determined by the Office of Management and Budget. The MSA must have a central city with a population of 50,000 or more.

10. LFA - Labor Force Area as determined by the Research and Analysis Bureau, Montana Department of Labor and Industry, consists of a central city or cities with a population of less than 50,000 and the economically integrated geographical area surrounding it.

11. SDA - The Job Training Partnership Act (JTPA) was established to replace CETA in job search, placement, relocation, and especially training assistance. Each state designs local plans for JTPA programs through a Private Industry Council (PIC). Each PIC jurisdiction is known as Service Delivery Area (SDA). The two SDA's for Montana are known as Rural CEP (Beaverhead, Broadwater, Deer Lodge, Granite, Jefferson, Lewis & Clark, Madison, Meagher, Powell, and Silver Bow counties) and Balance of State (the other 46 counties).

12. BENCHMARKING - It is a continuous process of establishing a new set of data which affects the series of estimates through revisions. Once a new benchmark is established, the adjustments to estimates between the new benchmark and the preceding one are carried forward progressively to the current month by use of sample trends. The benchmark is established less frequently (usually once a year) based on sample or secondary data. In case of employment data, the benchmark is used to establish the level of employment, while the sample is primarily used to measure the month - to - month changes in the level.

13. CES-790 Program - current employment statistics survey produces monthly estimates of a wide variety of employment and earnings information for the nation and each state.

Montana Employment and Unemployment Situation
(In Thousands)

	MAR. 1986 Prelim	FEB. 1986 Revised	JAN. 1986 Revised	MAR. 1985 Revised

Unemployment	36.5	37.1	36.8	36.7
Unemployment Rate	9.2%	9.5%	9.6%	9.2%

Economic Highlights and Employment Outlook:

STATEWIDE

Non-farm employment in the first quarter of 1986, while reaching its typical low point for the year, shows improvement over 1985. It is too early to tell if this is a precursor of a good year in Montana's economy as much of the increase in employment was in heavy construction. Since construction is highly seasonal in Montana a large factor of the increased employment could be due to mild spring weather.

Manufacturing is still lagging behind last years level by over 100 jobs. Stone, clay and glass production is ahead of a year ago but lumber and wood, as well as primary metal production, are holding durable manufacturing below last years level. Nondurable manufacturing bolstered by printing and publishing, sugar refining, bakery production and chemical products is ahead of first quarter 1985.

Mining employment started out the first quarter of '86 ahead of last year with metal mining and quarrying leading the way. Oil and gas extraction began below last years level and, responding to the drop in oil prices, began a steep decline in March. Several gold and other precious metal mines are in the planning or developing stages but the bust in the oil patch is overriding the prospects in hard rock mining. Overall mining employment will probably fall below last years level next quarter.

Construction employment in January and February was at the same level as a year ago. Heavy construction began improving in March and now there are about 800 more jobs in construction than there was in March of '85. While lower interest rates may have some influence on this, the increase is probably due more to seasonal factors. Employment in building construction lags last year by nearly 400 people.

Transportation and public utilities are continuing to lose employees. Railroad shops were closed in Livingston and a power company official said they will continue reducing their work force through attrition. More than 600 jobs have been lost in these industries since last year. A small railroad, created by a group of farmers from an abandoned branch line, loaded its first train of 52 cars with grain for a trip to the main line. They are optimistic that this will provide transportation for their crops this fall.

The trade industry has about 600 more employees than it did last year. Wholesale trade shows a loss of nearly 400 jobs. Large increases in auto dealers and service stations and eating and drinking establishments were enough to offset the losses in the rest of the retail sector and allow it to post a gain of nearly 1000 employees. Food stores posted a large employment loss from February to March when a major food store chain sold seven of its stores to a food wholesaler. The stores are being resold or leased to independent operators.

Finance, insurance and real estate continues to have about 200 less employees than it did a year ago. This loss of employment is contained in banking. Other industries in the sector remained about the same as last year.

The fast growing service industries have apparently slowed. There are only about 200 more employees in this secor than there was a year ago. Losses in business, social and miscellaneous services nearly cancelled gains in lodging, personal, health and agricultural services this quarter.

Government employment is currently about the same as a year ago but this will probably change soon. Reduced budgets at all levels of government appears to be the short term plans. State budget financing will be reviewed in a special legislative session in June.

In agriculture the all-commodity price index started out this year lower than January '85 but ahead of December '85. Following a very tough year in 1985 it appears that conditions are improving. Subsoil moisture is in good shape. It has been a very good calving and lambing season. Pasture conditions look good. Low-fuel prices will help the farmer cut planting costs.

GREAT FALLS MSA

During the first quarter non-agricultural wage and salary employment in the area is about 100 more than a year ago. Improvements in construction, services and government are being offset by losses in manufacturing, transportation and public utilities, trade and finance insurance and real estate. The unemployment rate in Cascade county is 8.3% in March compared with 8.8% a year ago.

Modernization of the military is providing a positive influence for the air base and the city. About 700 Air Force personnel came to Malmstrom while their runways in South Dakota are being reconstructed. A proposed tanker mission would mean $90 million in construction and renovation at Malmstrom. The Air National Guard unit at the international airport would get new aircraft which would mean $7.7 million in additional military spending to Great Falls over the next two years.

Two businesses have signed leases in the foreign trade zone. The operator of the trade zone expects their building will be full by the end of this year. Construction on a large retail store downtown should be finished for its scheduled opening in mid-October. A fast food restaurant being built downtown expects to open by June. A plastic bag factory capable of producing 1.5 million plastic grocery bags a day is projected for the area. The Montana Economic Development Board approved a $1.1 million loan to start a new television station in the city.

BILLINGS MSA

Non-agricultural wage and salary employment in the area is about 100 higher than a year ago. Manufacturing, retail trade and government show gains in employment. Industries losing jobs were mining, transportation, public utilities, wholesale trade, finance, insurance and services. The unemployment rate in Yellowstone County is 8.1% in March compared to 8.8% in March of 1985.

Food manufacturing employment was up due to the return of sugar beet growing and refining to the area. With the completion of a satisfactory campaign the company is looking to the future with plans of becoming a leader in the industry. A further boost to this industry could come from meat packing as serious efforts are underway to reopen the two plants that closed a year ago.

Several projects both downtown and at the city's edges are allowing Billings to continue to develop as a regional trade center. Low interest rates are making real estate people optomistic that sales will improve this year. Low fuel prices, while causing some concerns at refineries, are improving the outlook for the tourist industry.

MISSOULA - KALISPELL - SHELBY LFA

A California company plans to relocate in Missoula. The company manufactures a chemical purification product that could provide up to 150 jobs within five years.

Sixty-one employees of a tax analysis firm in Missoula were laid off because of the uncertainty over the future of the federal government's tax-credit programs. The company screens the new employees of other companies to determine whether the employers are eligible for special federal tax breaks such as that provided by the "Targeted Jobs Tax Credit" program.

A $3 million, 48,000 square foot sports, medicine and fitness center is planned for Missoula. Construction is scheduled to begin in May, and when completed by spring of 1987, should initially employ 15 to 20 people.

Employment levels in the logging industry have dropped off as the spring break-up necessitates the closing of logging roads and load limits being placed on the highways thus halting logging activities in many areas of western Montana.

Sawmills have also cut back in response to this, but they also find they have large inventories of finished lumber that needs to be reduced before more is processed. Lower fuel costs, lower interest rates and improvements in the construction industry should all contribute toward the future of western Montana's lumber industry.

Severe cash-flow problems have prompted a Polson manufacturer to shut down. The electronics firm manufactured components for the military and at its peak last year employed 72 workers.

Kalispell is preparing for a new $500,000 National Guard facility to be constructed soon. Coupled with that, local units of the National Guard and U.S. Army Reserve are anticipating increased federal authorization for more personnel as part of a move to improve our military preparedness.

A new fast-food business has opened in Kalispell. Seventy-five employees were hired to operate the business.

ANACONDA - BUTTE - HELENA LFA

A private health care company plans to build a 48 bed psychiatric hospital in Butte. The construction of the $5 million building would begin in June. The hospital could provide as many as 75 full-time jobs with an annual payroll of $1.5 million.

The Anaconda School Board, faced with declining enrollment, has decided to eliminate 11 teaching positions for the next school year. They felt that the positions could be reopened, however, if funding could be found.

Preliminary construction work has begun on an open-cut mine outside Helena in northern Jefferson County. The mine will extract gold, silver and zinc. It is possible for the construction period to employ up to 550 workers and when in full production, the mine and mill could need up to 330 employees to keep it operating.

Warmer weather has enabled construction crews to continue their road work on the interstate 15 projects south of Basin and south of Dillon.

A sawmill in Dillion made its point in a very novel way. In order to make people aware of the importance of the sawmill's payroll toward the local economy, it distributed its payroll in the form of $2 bills. Not only were $30,000 worth of these bills circulated but flourescent stickers stating "wood supported $" were attached to the personal checks that their employees wrote. The sawmill is trying to get local residents concerned over the Forest Service's plan to reduce the size of the upcoming timber cuts in the Beaverhead forest.

BOZEMAN - LEWISTOWN LFA

A local manufacturer of mobile homes has permanently closed its doors. A lot of effort was put into finding another buyer for the company to avoid the closure but a weak market for mobile homes seemed to be an obstacle that could not be overcome.

A lot of snow and mild weather certainly helped out the skiing industry. Other businesses such as motels and restaurants also noticed an improvement.

A locomotive repair shop in Livingston has shut down. Approximately half of the 360 affected workers took transfers out of state. Although the total impact on the local community of the loss of so many jobs is not yet known, it does seem obvious that the local economy has a bitter pill to swallow.

HAVRE - GLASGOW LFA

A new business has opened its doors in Glasgow. It is a general merchandise store that initially hired about 30 employees.

Agriculture in this area is looking for a better year than last. Moisture content appears good and weather conditions are favorable. Lower fuel costs should be a big plus as the spring planting gets under way.

Another factor that should help farmers and ranchers is interest rates that are running less than last year. Montana's state legislators have also tried to help in this area by passing a bill that calls for the State to purchase certificates of deposit from banks that agree to use the funds toward lower interest rate loans for local farmers and ranchers.

MILES CITY - GLENDIVE LFA

The big news of course is oil. With the going price for crude oil now below the break-even point, many local area producers have been forced to quickly suspend their operations in eastern Montana. For example, 12 employees in Sidney were called into the main office of their oil field delivery service business and told that the operation was shutting down that day.

Approximately 26 railroad workers were given transfers to Glendive when a locomotive repair shop in Livingston was recently closed. Although the employees are not new hires, they certainly are welcome in Glendive because of the expanded economic base their jobs provide to the community.

Average Weekly Earnings/Real Spendable Earnings

Real spendable weekly earnings hit an all time low in January with $73.65. A reverse in the Consumer Price Index occurred in February and March - the biggest two month decline in 36 years. This down shift in consumer prices was the strongest for any quarter since 1954. First quarter 1986 average weekly earnings is up 3.3 percent from first quarter 1985.

1/ Average Weekly earnings of total private nonagricultural production workers. 2/ Real spendable average weekly earnings of private nonagricultural production workers. 3/ Taxes computed on family with four exemptions. (P) Data for current month preliminary.

TABLE VIII-A

UNEMPLOYMENT INSURANCE: CLAIMS TO PAYMENT

Many of those persons who become separated from their jobs enter our local Job Service offices for two reasons: to seek employment and to claim unemployment insurance (UI) benefits. Claimant wage credits obtained from insured employers are examined to determine if the claim meets monetary eligibility requirements for UI benefits and, if so, for how much per week is the claimant qualified. Monetarily eligible claims are subsequently segregated according to criteria for establishing which party (claimant or employer) was most responsible for the job separation in question. Claims for job separations resulting from claimant actions (issues) are further subjected to the test of whether or not an individuals' reduction in his potential benefit duration is warranted. If otherwise eligible and if availability criteria continue to be complied with throughout his actual unemployment duration, weekly benefit payments will commence with the claimant's second week of unemployment (a waiting week must be served under Montana law). The number and amount of such payments by county are shown in the table on the following page. Interstate payments in the table refer to payments made to individuals who now reside in other states but who had established wage credits in Montana based employment. Amounts shown in the table are financed through employer taxes paid to the Montana UI Trust Fund Account.

2/ COMPUTED FROM WHOLE (UNROUNDED) NUMBERS.

3/ 1972 STANDARD INDUSTRIAL CLASSIFICATION ESTABLISHMENT DATA. SUBTOTALS MAY NOT ADD DUE TO ROUNDING.

4/ SOURCE

PRODUCED IN COOPERATION WITH THE U.S. BUREAU OF LABOR STATISTICS, BY:
RESEARCH AND ANALYSIS BUREAU
DEPARTMENT OF LABOR AND INDUSTRY, HELENA, MONTANA
REVISED TO 1985 BENCHMARKS.

SOURCES OF DATA

S-1. Prepared by the Montana Department of Labor & Industry, Research and Analysis Bureau, in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics (BLS). LAUS data (Local Area Unemployment Statistics program) are adjusted to the Current Population Survey benchmark and are the official BLS approved series that are used to allocate Federal funds and determine eligibility for Federal assistance programs. This series represents employment and unemployment by place of residence and are not comparable to the place-of-work industry employment series (CES data). Workers involved in labor disputes are counted as employed. Total employment in the labor force also includes agricultural workers, unpaid family workers, domestics, and self-employed.

S-2. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau. The unadjusted unemployment rate is prepared by the LAUS program in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. The seasonally adjusted rate is an unofficial series and is provided only as an informational economic time-series.

S-3. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau from LAUS data. Data for Congressional Districts, Service Delivery Areas and Labor Force Areas are calculated from the official data series by summing up employment and unemployment for the appropriate counties involved and calculating an unemployment rate from the summed data for each area.

S-4. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau, in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Data from the CES (Current Employment Statistics) program represents employment by place-of-work and cover full-time and part-time employees who worked during or received pay for the payroll period that includes the 12th of the month. The data exclude the self-employed, volunteers, unpaid family workers, and domestic workers. Persons on sick leave, vacations, or holidays, and being paid for that period by their employer, are considered employed. Payroll and worker-hour data are collected for production and related workers in manufacturing industries, nonsupervisory workers in private service-producing industries, and construction workers in construction industries. The earnings figures are "gross" figures; that is, they reflect changes in wage rates, shift differentials, and premium pay for overtime work. The hours figures relate to the hours for which pay was received; this is different from scheduled or standard work hours.

S-5. Prepared by the Montana Department of Labor and Industry, Researh and Analysis Bureau from CES data. Female employment is not an official series and is provided only as an informational economic time-series.

S-6. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau. Average Weekly Earnings of total private nonagricultural production workers is prepared by the CES program in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics and is an official BLS data series. Real Spendable Weekly Earnings is not an official series and is provided only as an informational economic time-series.

S-7. Tabulations produced by the U.S. Department of Labor, Bureau of Labor Statistics and reprinted by the Montana Department of Labor and Industry, Research and Analysis Bureau for informational purposes only. This is a national data series because Montana data is not available.

S-8. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau from Unemployment Insurance administrative records and is produced for informational purposes only.

S-9. Prepared by the Montana Department of Labor and Industry, Unemployment Insurance Division to meet federal reporting requirements (ETA 5159, DE 230, and ETA 2112 Reports) and is reprinted by the Research and Analysis Bureau for informational purposes only.

S-10. Prepared by the Montana Department of Labor and Industry, Unemployment Insurance Division and is reprinted by the Research and Analysis Bureau for informational purposes only. (DE 230 Report.)
